Đặng Đông Quân

GAME DESIGNER

Game Designer specializing in gameplay systems and rapid prototyping, with a solid foundation in narrative and level design. Focused on crafting engaging player experiences by integrating well-structured gameplay mechanics, immersive storytelling, and purposeful environment design. Experienced in translating design concepts into playable Unity prototypes to validate ideas and iterate based on player feedback, while contributing effectively within a professional game development team.

Education

Van Lang University — 2021 - 2026

Software Engineering

Software Engineering, Unity development, gameplay prototyping, and game design fundamentals

Skills

- Level Design
- System Design
- GDD Writing
- Narrative Design
- Unity (C#)
- Leadership - Teamwork
- Figma Design

Activities

Gametopia Ha Noi 2026 — 21/02/2026 - 04/03/2026

Game Designer - Leader

- Designed a career-based repair gameplay loop from receiving jobs at the office to completing on-site electrical repair tasks
- Built a tool-selection system with limited inventory slots, adding pre-mission planning and light strategy to each job
- Designed diagnosis and repair minigames with time pressure and quick-time events to increase execution challenge
- Structured a career progression system with tool upgrades, higher-value jobs, and increasingly complex work environments

Global Jam 2026 — 30/01/2026 - 01/02/2026

Game Designer - Leader

- Designed an emotion-detection gameplay system where players infer customer feelings through mask changes, dialogue cues, and visual feedback
- Created a branching dialogue structure that shifts customer emotions and leads to multiple character endings
- Designed a drink-brewing and scoring system combining correct emotion reading, recipe selection, and survival-based performance
- Built a day-based progression loop with increasing emotional complexity, hidden information, and long-term ending conditions

Certifications

2025

Aptis B1 Certificate

2024

Game Design and Development Certificate

Interests

Game mechanics analysis and research, exploring new gameplay systems and design ideas, video games
