9. Production Plan

1. GAME OVERVIEW

1.1 High-level concept

Pressing a Button is a humorous 2D survival game about an amnesiac who wakes up in an empty white room with a large button at its center. The player's objective is to press the button and survive whatever it brings into the room. The player has three lives.

2. CORE GAMEPLAY MECHANICS

2.1 Core loop

1. Move
2. Press the Button
3. Survive the hazards triggered by the button

2.2 Player actions

Action	Current Input
Move	WASD / Arrow
Interact	Press E
Dash (cooldown 1.5s)	Press Space

2.3 Achievement System

Whenever a new item or feature is unlocked, the game notifies the player. Players can review their complete achievement list at any time.

3. NARRATIVE AND STORY PROGRESSION

3.1 Start

The player wakes up in an empty white room with a single red button in the center.

3.2 Events

After the player presses the button, wait for a random delay of **2-5 seconds** before triggering the selected event. Events should **not** occur immediately after the button is pressed. This short delay builds anticipation and gives players time to react.

Name	Type	Spawn Chance	Description
Poison Gas	Persistent Threat	7% → 1% (<i>Gas > 60%</i>)	Poison gas permanently increases by 2%. Wind chance increases to 40% when gas covers more than 60% of the room.
Crack	Persistent Threat	10% → 2% (<i>10+ Cracks</i>)	Cracks grow into holes. Earthquake, Rocket, and Bomb Rain may convert cracks into holes.

Hole	Persistent Threat	7% → 2% (8+ Holes)	Holes expand over time. Large objects such as the Golem may fill small holes.
Spike	Persistent Threat	10% → 3% (10+ Spike Tiles)	Remains for 2 button presses. Can be destroyed by Meteor , Rocket , Crusher , and Bomb Rain .
Broken Floor	Persistent Threat	7% → 2% (25% Floor Broken)	Permanently blocks movement.
Vine	Persistent Threat	7% → 2% (50% Floor Covered)	Slows the player. Burned by Fire , Laser , Rocket , or eaten by Slime .
Smoke	Persistent Threat	7% → 1% (Smoke > 50%)	Reduces visibility. Wind chance increases to 35% when smoke becomes dense.
Camera	Psychological	4%	If active for a long time, Drone chance increases to 20% .
Alarm	Psychological	4%	Increases the probability that the next event is an Immediate Threat.
Water	Persistent Threat	10% → 2% (Water > 60%)	Water rises by 2% permanently. Fire is extinguished , while Wind chance increases to 20% to create waves.
Fire	Persistent Threat	10% → 2% (Fire > 50%)	Fire spreads permanently. Burns vines and ignites Poison Gas. Water chance increases to 35% when fire becomes widespread.
Obstacle	Persistent Threat	15% → 5% (15+ Obstacles)	Permanently blocks movement. Destroyed by explosions or eaten by Slime .
Ball	Immediate Threat	10% → 3% (5+ Balls)	Wind changes its trajectory. Destroyed by Crusher , Meteor , or Slime .
Bee Swarm	Immediate Threat	7% → 2% (2 Swarms Active)	Bees avoid smoke and are killed by explosions or crushers.

Drone	Immediate Threat	7% → 20% (<i>Camera Active</i>)	Explodes on impact and destroys nearby destructible objects.
Meteor	Immediate Threat	7%	Destroys obstacles, vines, spikes, and cracks within its impact area.
Rocket	Immediate Threat	4%	Explosion destroys nearby hazards and obstacles.
Bomb Rain	Immediate Threat	4%	Explosions destroy obstacles, spikes, vines, and cracks.
Crusher	Immediate Threat	4%	Crushes obstacles, balls, slimes, bees, and spikes.
Wind	Immediate Threat	7% → 40% (<i>Gas > 60% or Smoke > 50%</i>)	Pushes the player and moving hazards while blowing away Poison Gas and Smoke .
Slime	Immediate Threat	2% → 12% (<i>15+ Obstacles or Vines</i>)	Consumes obstacles, vines, balls, and fake buttons, growing larger each time.
Ice Floor	Event Modifier	7%	Makes movement slippery. Wind becomes significantly stronger while active.
Darkness	Psychological	4%	Makes Laser, Rocket, Bomb Rain, and Meteor warning indicators much harder to see.
Golem	Immediate Threat	2% → 10% (<i>Too Many Obstacles</i>)	Crushes obstacles, spikes, slimes, bees, and balls while walking.
Speed	Reward	3% → 15% (<i>Player survives 5 consecutive Immediate Threats</i>)	Increases movement speed for 3 button presses.
Heal	Reward	70% (<i>Only when the player has 1 Heart remaining.</i>)	Restores 1 Heart.

3.3 Ending

After the player has pressed the button 20-30 times, a door opens. Entering it leads to another room identical to the first one, except the button is purple. Pressing the purple button causes the player to wake up in a hospital, revealing that they have been in a coma following an accident.
